DODSON - PIKES PEAK (EARNHARDT COLLECTION)

PIKES PEAK (EARNHARDT COLLECTION) 2022 Sq.Ft. $274,051

Just like the mountain that inspired its name, Pikes Peak is designed to provide a spectacular view of nature's landscape. From the moment you catch site of this home with its beautiful covered porch to that first step into the foyer displaying an abundance of natural light, you'll picture your family's escape from the world. The great room has an open feel accentuated by a cathedral ceiling that leads directly to the back porch where you can relax and unwind. When it's time to entertain, you'll be happy to gather around the large kitchen island. And in the evening, the large owners' retreat with plenty of walk-in closet space and a spa-inspired owners' bath provides a great place to retire after a long day.

"The endless view of this floor plan at first step and all the way through its unique layout reminds me of Pikes Peak Mountain. Every year during our race weekend at Pikes Peak Raceway, Rene' and I would plan a leisurely drive up Pikes Peak Mountain in hopes of seeing any wildlife we might stumble across along the way. One year we were lucky enough to see a double rainbow at the top. No wonder it's referred to as 'America's Mountain' and no doubt this home design will be one of America's favorites, too." – Kerry

GARAGES

		Quantity	Unit Price	Price
	FRONT FACING GARAGE Your home includes the garage door on the front of the home.	1	--	Included

FOUNDATION & FRAMING

A STRONG FOUNDATION

Your entire home will have a full basement with 8' solid poured concrete walls with vertical and horizontal steel rebar which gives you an exponentially stronger and drier basement than stacked hollow core block walls with mortar joints. Block walls are very porous and will allow water in over time and as you get above an 11 course block wall your walls are even further weakened. You will have plenty of room to finish your basement in the future and can rest assured that it will be dry with our 30-year transferable waterproofing warranty. Have some fun at one of our Design Studios and compare by picking up our basement wall section vs. hollow core block – the difference will be crystal clear.

2 X 6 WALL CONSTRUCTION

2X6 walls give your home greater structural strength and integrity. You will have a durable and sound structure that you can be completely confident in what you're buying. This on top of your solid concrete foundation makes a rock solid, high performance wall system that shows our commitment that your home is built like a tank.

OSB WALL SHEATHING

When comparing to foam board, OSB has much more structural integrity. When siding is installed on your home we are putting it over wood as opposed to over foam board. The stronger wall minimizes wavy siding. When foam board is used, it's easy to puncture or break during application and therefore leaves a lot of gaps and areas for air penetration. OSB is much more secure, where with foam board, you can pull off the siding and break into the house with a utility knife. We also place a high performance house wrap on all exterior walls providing additional protection against the elements.

	Quantity	Unit Price	Price
9 FOOT POURED CONCRETE WALLS A very popular way of doing basements around the country. Your basement walls are formed and then poured with solid concrete. This is much stronger than a block foundation.	1	$4,207.00	$4,207.00

HOME OPTIONS

EXTERIOR

	Quantity	Unit Price	Price
INCLUDED FRONT ELEVATION HORIZONTAL SIDING Needs Trim Finish Needs Included front elevation horizontal siding Finish The exterior finish materials on the front of your Schumacher Home will be determined by the elevation you have chosen. 	LEVEL 2 LAMINATE Needs Level 2 laminate Finish If you love the look of real wood, but have an active lifestyle this is more resistant to scratching and denting than wood flooring. A thicker product which provides superior design, texture and color which looks and sounds like real wood. Foyer, GR, DR, Kitchen, Owner's Bedroom	1297	$6.50	$8,430.50
	LVT Needs LVT Finish AduraMax provides the look and elegance of tile or stone without the worry. AduraMax delivers award-winning fashion to your home. With proprietary technology, AduraMax is engineered to look and feel like the real thing and easy to maintain. All 3 baths	145	$7.30	$1,058.50
	SWITCH PLATE AND OUTLET COVERS (ENTIRE HOME) Needs Switch plate and outlet covers (entire home) Finish	1	--	Included
	TRIM MATERIAL Your trim package includes white painted MDF woodwork with 2 ¼" colonial casing around the doors and the base will be 3". All windows will be drywall wrapped and will have a window sill of the selected trim. Passage ways between rooms will be drywall without casing. All exterior doors will have one or two wood steps.	1	--	Included
	SIX PANEL SQUARE HOLLOW CORE INTERIOR DOORS (ENTIRE HOME) The included white interior doors are 6-panel hollow core molded.	1	--	Included
	SIX PANEL GARAGE DOOR INTO HOUSE	1	--	Included
	DOOR KNOBS Included doorknobs are a round knob with a satin nickel finish. All exterior doors come equipped with a dead bolt.	1	--	Included
	HANCOCK ENTRY KNOB (SATIN NICKEL) Included entry doorknobs are a round knob with a satin nickel finish. All exterior doors come equipped with a dead bolt.	1	--	Included

	PLUMBING The included plumbing faucet package features chrome Delta faucets with shut-off valves at all sinks, faucets and water closets. We also include two exterior freeze-proof faucets, waterline to icemaker and the utility hookups for the washer.	1	--	Included
	PEX WATER SYSTEM WITH MANIFOLD This is the latest in technology that brings you and your family the highest quality water for health and for performance. For health it is non corrosive and chemical free. Whereas copper corrodes over time and CPVC uses solvents/glues that give off chemicals in your water. For performance PEX is a continuous single run to each fixture with no elbows/joints. Whereas copper has multiple connections held together by flux and solder and CPVC has 100's of joints held together by solvent and glue which over time the joints create multiple points for failure. In addition we provide a full manifold system with a shut off valve to every fixture much like the electrical box in your home.	1	--	Included
	TUB / SHOWER Your home includes a 5' fiberglass one piece tub and shower combination. One piece units are maintenance free whereas multi-piece units require caulking and continuous maintenance.	1	--	Included
	ROUND WATER CLOSETS (EACH) Round front bowl with three cushioned tank-to-bowl connections assures perfect alignment and leak proof connections.	2	--	Included
	INCLUDED 50 GALLON ELECTRIC WATER HEATER Your water is heated by a 50 gallon electric water heater with pressure relief valve.	1	--	Included
	GAS LINE TO RANGE .	1	$233.00	$233.00
	ROUGH PLUMB FULL BATH IN BASEMENT This choice is very popular with our homeowners planning to finish a basement recreation room, office, or extra bedroom in the future. We will rough plumb floor drains and vents for a tub, sink and water closet (no water lines or fixtures). Our design staff will locate the rough plumb in the location you desire. A great resale feature even if you have no plans. With this option, you must choose the grinder pump option which is required when there is a "high rough" sewer/septic situation.	1	$690.00	$690.00
	GARBAGE DISPOSAL (ONE-HALF HORSEPOWER) One-half horsepower garbage disposal manufactured by the industry leader, Badger, installed and warranted by our professionals. NOTE: if you are on a septic system some counties restrict the use of garbage disposals.	1	$221.00	$221.00

	INCLUDED LINDEN KITCHEN FAUCET (CHROME) Single handle kitchen faucet. Spout swivels 120 degrees for added convenience.	1	--	Included
	INCLUDED LINDEN LAVATORY FAUCET (CHROME) Two handle centerset lavatory faucet with metal pop-up.	3	--	Included
	INCLUDED LINDEN TUB/DECK MOUNTED FAUCET (CHROME) Wide Spread two handles with Roman design.	1	--	Included
	INCLUDED LINDEN SHOWER ONLY FAUCET (CHROME) Single lever handle for ease of temperature control.	1	--	Included
	INCLUDED LINDEN TUB/SHOWER FAUCET (CHROME) Single lever handle for ease of temperature control.	1	--	Included
	INCLUDED LINDEN TUB ONLY FAUCET (CHROME) Single lever handle for ease of temperature control.	1	--	Included
	DOUBLE BOWL STAINLESS STEEL UNDERMOUNT KITCHEN SINK FOR GRANITE OR QUARTZ COUNTERTOP	1	$0.00	$0.00
	4' TILE SHOWER WITH FIBERGLASS BASE - 3 WALLS TILE WITH SEMI-FRAMELESS DOOR (LEVEL 3) Needs 3 walls tile with semiframeless door (level 3) Wall Tile Level 3 Finish Needs 3 walls tile with semiframeless door (level 3) Plumbing Shower Door Finishes Finish Needs 3 walls tile with semiframeless door (level 3) Grout Finish This 4' wide shower will include 3 walls tiled 7' in height with a fiberglass floor. This also includes a clear glass semi-frameless shower door, which is available in Chrome, Brushed Nickel and Venetian Bronze. This tile shower will include a recessed shelf niche (12"x20").	1	$4,062.00	$4,062.00
	TUB Needs Grout Finish Needs Level 1 Finish Your home includes a white 5' fiberglass tub. This includes 12 inches of level 1 wall tile around the perimeter of the unit.	1	--	Included

	PAINTING All interior walls will be painted with a low VOC flat finish paint manufactured by the industry leader, Sherwin Williams. Interior walls include two coats of finish paint. The exterior doors will be finished with two coats of exterior paint, and the garage walls (per plan) are completely painted	1	--	Included
	LIGHTING Your home will have four recessed lights in your kitchen, your choice on the location. The interior lighting will be in a brushed nickel finish. The exterior lighting package is in an antique bronze finish and includes one coach light at the front door, two garage coach lights (per plan) and one light at the rear/side door.	1	--	Included
	INCLUDED BRAVO DINING ROOM FIXTURE (BRUSHED NICKEL) Width/Diameter: 24", Height: 21", P4622-09	1	--	Included

Next to Laundry Room - Laundry reconfigured to have space between laundry and steps for lockers	42	$21.00	$882.00

MECHANICALS

ENERGY EFFICIENT CONSTRUCTION
When it comes to energy efficiency it is easy to get wrapped up in a bunch of industry lingo and complicated ratings that few understand. Energy efficiency to us simply means saving our homeowners every month when they get their utility bills so that's why we use the extra thick walls with R-19 insulation, a high efficiency heating and cooling system, house wrap with a caulk and sealant package on the entire house to minimize air infiltration, and Low-E windows just to name a few. When you build a custom home with Schumacher, you are investing in an energy efficient home that will save you money today and tomorrow.

		Quantity	Unit Price	Price
	INSULATION The extra thickness you get with a 2x6 wall vs. a 2x4 wall provides for a higher R value. All your exterior walls of the living spaces will be insulated with R-19 insulation and your ceiling will have R-40 (R-38 in cathedral ceilings) blown in to make for a tight sealing system. All homes come with a caulk and sealant package as well as house wrap making your home feel exceptionally comfortable. Exterior garage walls and garage ceilings are not insulated (per plan).	1	--	Included

	DRYWALL Your home will have ½" drywall on all interior walls and 5/8" on all ceilings with 24" on center framing. The thicker ceiling material makes for a more uniform finish and eliminates sagging over time. We nail, screw and glue all of our drywall (glue not used on ceiling drywall) – it's just the best way to do it. A moisture resistant drywall will be used around any shower or tub units. The ceiling texture will be an antique knock down finish and the garage is completely finished with drywall (per plan).	1	--	Included
	ELECTRICAL The included electrical service in the home is a 200 amp service. You will have the choice of either 3 phone or cable outlets to be placed at your preference. There is an exhaust fan in all bathrooms and your range and dryer will be wired for electric. We will also install a dedicated circuit above your range so the appliance store can easily install a microwave.	1	--	Included
	OPTIONAL ELECTRIC FURNACE WITH 14 SEER HEAT PUMP IN PLACE OF INCLUDED GAS FURNACE AND AIR CONDITIONING You can purchase this option when natural gas is not available. Your heating and cooling system will be an electric furnace with a 14 SEER heat pump in place of the included gas furnace and air conditioning. The heat pump will serve as your central air conditioning as well as making the electric furnace more efficient. Also included is an energy saving programmable thermostat.	1	$0.00	$0.00

HOMESITE PREP & UTILITIES — $14,500.00

LOT CONDITIONS

LOT PREP AND UTILITIES
Because we are an on your lot custom homebuilder and each site is unique, the base price of your home does not include homesite preparation or utilities. Your New Home Consultant will enter allowance amounts in this category based on your specific homesite. After signing your purchase agreement, we will schedule your home site inspection where you will meet with your personal builder on your site to review any unique characteristics and utilities. The initial allowance amounts are then adjusted (if needed). Installation of a temporary electric pole is included in the base price and the jobsite will include a dumpster for removal of all product debris.

		Quantity	Unit Price	Price
	SAFETY NET We will eliminate as much uncertainty as possible at your home site inspection, but we won't know everything until we actually dig. The Safety Net Allowance is an option that allows you to set aside additional funds for any unforeseen excavation challenges. An example of one of these challenges may be unsuitable soil conditions. We recommend including an allowance of $3,000 into your Custom Home Quote. Any unused portion of the Safety Net Allowance will be refunded to you when your new home is complete.	30	$100.00	$3,000.00

	LOT CLEARING - CLEAR LOT A clear lot is defined as nothing over one foot high to include grass, trees, bushes, etc. in the area and perimeter of where the house will be placed.	1	$0.00	$0.00
	GARAGE AND PORCH GRAVEL ALLOWANCE Due to unsuitable soil conditions it may be necessary to backfill areas such as garage and porch with gravel. Your personal builder will discuss these items in detail at your homesite inspection.	40	$100.00	$4,000.00

UTILITIES

		Quantity	Unit Price	Price
	OVERHEAD ELECTRIC Overhead electric is included. As the homeowner you will need to contact you local electric company for detail on your overhead electric lay out.	1	$0.00	$0.00

MISCELLANEOUS PREP ITEMS

		Quantity	Unit Price	Price
	WALKOUT BASEMENT MATERIAL AND LABOR ALLOWANCE When considering a walkout basement additional materials and labor will be required to take all footers of the exposed foundation below frost depth. Refer to the Window or Exterior Door Section for types, sizes and styles of doors and or windows you may want to include. Your personal builder will discuss these items in detail at your homesite inspection. Full Walkout rear of home - Rear Porch should be decking material, not a foundation	75	$100.00	$7,500.00
	FHA/VA REQUIREMENTS If electing FHA or VA financing, your lender will require to include an allowance in your Price Quote/Purchase Agreement to pay for landscape grade with seed and straw, a serviceable driveway to garage, a serviceable walk to the front door, and a termite treatment for your foundation. These items are not included in the base price of your home. Please note this is an allowance only. This is a general list of FHA and VA requirements, your actual list of requirements will be determined by your financial institution.	1	--	Included

CHOOSE FINISHES

INTERIOR

PERSONAL SELECTIONS

We've created a unique space for you to see and touch every finish for your home featuring the most high performing and current materials and trends in Home Building today all under one roof. We will guide you through the process and help make it fun and exciting.

OUR WARRANTY

TEN YEAR INSURED WARRANTY

Every Schumacher Home is backed by a Ten-Year Insured Transferable Structural Warranty. The guidelines to qualify for this warranty are so strict that only 1% of builders nationwide qualify to offer it. Requirements include not only superior building materials and workmanship, but financial management and customer satisfaction as well. 2-10 Home Buyers Warranty®, which provides the insured warranty, is the largest construction insurance company in the country. We are pleased to have received the Diamond Builder Award® by 2-10 Home Buyers Warranty® - an award for excellence in construction standards and customer satisfaction that has only been given to 40 builders nationwide in the last 20 years.
