Shoemaker Rigging & Transport is pleased to provide this proposal for the following work:

Work Scope – Provide the labor, equipment, and transportation to relocate the existing Laser Welding cell

- Shoemaker Rigging would provide the labor, equipment, and transportation to relocate and reassemble the existing Laser welding cell from Velocys in Plain City, OH to East Grandby, CT.
- Shoemaker Rigging would separate the three main components of the machine and prepare them for transport.
- Shoemaker Rigging would transport the machinery on a step deck Conestoga trailer to protect the machine from the elements.
- The owner would be responsible for the unload and placement of the machinery when it arrives in Connecticut.

This project is based upon the scope of work listed above. Any work beyond this scope must be approved, in writing, and signed by the owner or their designated representative. Clear access for cranes, equipment, and labor to all working areas is required. Removal of any obstruction is the responsibility of the owner. It is assumed that all aprons, driveways, hard-surfaced areas, and plant floors are adequate for the necessary loads - static or moving - for all machinery and equipment used on this project. Delays due to non-Shoemaker Rigging arranged transportation could incur additional charges.

Total estimated cost for machinery disassembly and packaging……. $15,310.00 USD

Total estimated cost for transportation……. $4,800.00 USD

Notes: Work would be performed during normal work hours (M-F 7 AM – 3:30 PM); additional work may incur time and material rates.

Terms: Full payment prior to machinery shipment. Proposal good for 60 days.

Thank you for the opportunity to work with your company, we appreciate the opportunity.

Regards,

Michael Cullion
