Joe,

Following is a quote for the work we discussed this week located in Cincinnati. Most times asphalt plants will take existing asphalt to recycle, if they will not take the sub stone we might spread on existing stone already in ROW. Crossings included are: Montgomery, Madison, Edwards, Michigan, Shaw, Hyde and Monteith. Still waiting on a reply form Bob Vickrey from the City. Work to include:

-Mobilization
-Traffic control
-Saw cut where needed
-Excavate and remove rail and ties
-Place ties and rail onsite in ROW next to road crossing
-Excavate and haul off excess asphalt and stone
-Fine grade and compact sub grade
-Place two lifts of asphalt per city specs.
-Remove and replace walks as needed
-Clean-up

Total: $105,000.00

Thanks for the opportunity to bid!!!
